

**Specialists in
prototype
and low volume
production**

**Aluminum,
Magnesium
and Zinc.**

 **American
Precision Castings** Inc.

Low volume production.

// APC stands behind their product and gives me good turnaround, and good quality parts, both dimensionally and physically. //

Plaster, no-bake and green sand casting processes.

**Satisfying
industry
leaders for
50 years**

APC has forged strong relationships with industry leaders by always going the extra mile. That means delivering the product on time, offering affordable prices and meeting every client specification. We help make your job easier by working together to determine the best product for your production dollar. With APC, you'll benefit from a true partnership with experts who care as much about your product as you do.

Complete finishing services: machining, paint, assembly and testing.

APC uses the plaster and sand mold processes to produce castings in aluminum, magnesium and zinc.

Our prototype castings offer you an economical way to prove your designs before you invest in more expensive, permanent tooling. We like to think of it as "design insurance" – our prototypes help ensure your design is optimized to avoid costly complications.

We'll work with you to determine the best process and cast material for your project.

For quality, precision and fast turnaround, choose the specialists at APC. See for yourself why we're one of the world's leading plaster and sand mold prototype casting and low volume production companies.

The APC advantage

APC plaster molds look a lot like a die casting coming out of a steel die. //

CAD file to castings in 2-3 weeks.

// When APC brings the job in, it's right the first time. It's like a mind meld when we get together with them. //

APC has a long-standing commitment to providing our customers with the best value and best solutions. Let us meet your casting needs with a fast turn-around on high-quality parts. Call now for a quote on your project.

From toys to medical, automotive and aerospace . . . APC castings satisfy the toughest customers.

APC's Quality Commitment is your design insurance.

Here is how you can benefit from APC's expertise and quality commitment in prototype casting and low volume production:

- Eliminate potential errors.
- Reduce tool building costs and time.
- Reduce problems or delays in the development of permanent tooling.
- Interim casting production during die construction.
- Use the prototype to run engineering tests.
- Check the design integrity.
- Gain time to accurately finalize the design.
- Anticipate and solve non-casting production problems.
- Get your product to market faster.
